Domisili: Indonesia • Status: Tersedia

3+ Tahun

Pengalaman Mobile Development

3+ App

Terpublikasi di Google Play Store

99.8%

Crash-Free Users Session Rate

Ringkasan Profesional: Mobile Software Engineer di PT. Cakrawala Bima Instrument yang berdedikasi membangun aplikasi Flutter & Dart berkinerja tinggi (60 FPS) untuk telemetri IoT (MQTT, WebSocket), konektivitas hardware (Bluetooth Serial SPP, BLE Bridge), presensi geofencing radius akurat, dan modul enterprise multi-level. Mahir menerapkan Clean Architecture, BLoC / Riverpod state management, integrasi REST API Dio, serta penerbitan aplikasi di Google Play Store.

KEAHLIAN TEKNIS & SPESIALISASI

Mobile Dev (Flutter & Dart):

Flutter SDK Dart BLoC / Cubit Riverpod Provider
Clean Architecture 60 FPS Fluid UI Platform Channels

Data & Penyimpanan Lokal:

REST API (Dio) SQLite (sqflite) Hive DB Offline Sync
JSON Serialization

IoT, Hardware & Komunikasi:

MQTT (EMQX/Mosquitto) WebSocket Real-Time Bluetooth Serial SPP
Bluetooth Low Energy (BLE) RTSP / WebRTC Stream

Keamanan, Lokasi & Rilis:

Geolocator & Geofencing Anti Mock GPS JWT Auth
Google Play Console (AAB) Git / GitHub

PENGALAMAN KERJA & PROYEK PRODUKSI

Mobile & IoT Software Engineer — PT. Cakrawala Bima Instrument

2024 - SEKARANG

- Sistem Terpadu SPPG Enterprise (2025 - 2026):** Mengembangkan frontend enterprise kompleks 5 modul terpadu: Menu Planning (Ahli Gizi), Purchasing/Accounting, Gudang Bahan Baku, Kitchen Production, dan Logistik Distribusi dengan sinkronisasi state multi-role.
- CBI SmartWatch BLE Bridge System (2025):** Mengembangkan sistem bridge Bluetooth Low Energy (BLE) antara smartwatch Android dengan aplikasi official GloryFitPro di Google Play Store untuk sinkronisasi telemetri data kesehatan.
- CAIS - Geolocation Attendance & HR System (2025 - Play Store):** Membangun aplikasi presensi mobile berbasis Flutter dengan validasi geofencing radius kantor, deteksi anti-fake GPS, manajemen cuti, rekap kehadiran, dan approval WFH via REST API.
- HVAS - High Volume Air Sampler Telemetry (2024 - Play Store):** Mengembangkan aplikasi telemetri lingkungan yang berkomunikasi via Bluetooth Serial SPP dengan mikrokontroler sensor HVAS untuk monitoring sampel kualitas udara real-time.
- SmartShelter IoT & Pemantauan IPAL (2024 - Sekarang):** Mengimplementasikan arsitektur MQTT lossless untuk telemetri sensor lingkungan dan integrasi live stream kamera keamanan IPAL.

PORTOFOLIO APLIKASI UTAMA

CAIS Mobile (Attendance & HR)

Play Store

Aplikasi absensi presisi dengan verifikasi radius geofencing kantor, rekap kehadiran, perizinan cuti & WFH.

Flutter • Dart • Geolocator • REST API • Play Store

HVAS Telemetry System

Play Store

Monitoring sensor kualitas udara real-time dengan konektivitas Bluetooth Serial SPP ke perangkat hardware.

Flutter • Dart • Bluetooth Serial • Play Store

CBI SmartWatch BLE Bridge

Wearable IoT

Bridge komunikasi data sensor smartwatch dengan sistem aplikasi original GloryFitPro via Bluetooth Low Energy.

Flutter • Dart • BLE GATT • Wearables

SmartShelter & IPAL IoT

Industrial IoT

Sistem monitoring telemetri sensor lingkungan berbasis MQTT dan streaming kamera keamanan IPAL.

Flutter • Dart • MQTT • WebSocket • RTSP Stream
